RE: Proposal for Professional Consulting Services
Proposed Rte. 82 Water Main Extension

Dear Mr. Pianka:

Barton and Loguidice, LLC (B&L) is pleased to submit this proposal to provide the Town of Bozrah with consulting engineering services related to the proposed water main extension between Noble Hill Road and the Town Line to the West.

We understand that the Town has recently discussed the proposed extension with Norwich Public Utilities (NPU). NPU has asked for a study be performed for the area to be served by this water main extension to evaluate potential future flow demand and review pipe sizing.

B&L proposes to perform the flow evaluation, which will include analysis of the parcels located along the route as well as uses permitted by current zoning of these parcels in order to determine maximum potential flows through the proposed main. B&L will then develop a hydraulic model of the proposed extension and, using pressures at the point of connection provided by NPU, evaluate residence times and velocities within the proposed extension for various pipe sizes and make a recommendation that balances potential future flows with minimization of required blow-off at the end of the extension as this will be the financial responsibility of the Town.

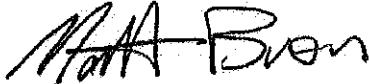

B&L is prepared to begin work on this project immediately. Fees for our services will be billed on an hourly basis in accordance with the attached rate sheet. We suggest a not to exceed budget of \$7,500 for this work.

Thank you for the opportunity to work with you on this project. Please provide written confirmation to proceed with these services by signing the Authorization below and

Subject: Water Main Extension

NPU has requested a study be performed to show what potential future flows will be in the proposed water main extension. This will involve analyzing the parcels along the line as well as existing uses and zoning permitted uses to determine what could happen in the future. Our proposal to perform this work is attached. Please let me know if you have any questions. Thanks

Matt,
My apologies. This fell into the abyss. We have a WPCA meeting on June 13 , BOS on June 20 and a BOF on June 26. I will have a course of action at that time.
Glenn
