Energy Charge	\$ 0.1440	\$ 0.1389	\$ 0.1336 per kWh

**Determination of Billing Capacity:** The billing capacity in any month is the highest measured kilowatts within such month, but not less than one kilowatt. The interval for measuring billing capacity is 15 minutes.

**Primary Metering:** Where service is metered on the primary side of the transformer bank installed to serve the Customer, the number of kilowatt hours used in computing the charge will be reduced by 2 percent.

**LARGE GENERAL SERVICE**

**Electric Rate No. 5**

Effective in all Towns supplied by the Company.

**Availability:** For all lighting, heating and power for a Customer subject to the Rules and Regulations of the Company located on the Company's Distribution Lines suitable for supplying the service requested.

Service shall be of one standard voltage delivered at one point through one installation of transformers when supplied by the Company and metered by one metering installation.

<b>Monthly Rate:</b>	<b>April 1, 2018</b>	<b>April 1, 2019</b>	<b>April 1, 2020</b>
Service Charge	\$100.00	\$125.00	\$150.00
Capacity Charge			
First 50 kW billing capacity or less	\$490.90	\$550.00	\$610.00
All kW over 50 kW	\$ 9.80	\$ 11.00	\$ 12.20
Energy Charge	\$ 0.1179	\$ 0.1175	\$ 0.1171 per kWh

**Excess Reactive Capacity Charge:**

All reactive kVA in excess of 50% of kW of Billing Capacity as follows:

<b>April 1, 2018</b>	<b>April 1, 2019</b>	<b>April 1, 2020</b>
\$0.50	\$0.51	\$0.52 per kVA

**Minimum Charge:** The minimum monthly charge shall be the sum of the capacity charge and reactive charge. The Company may however, require a higher minimum charge where the installation is of large size or is affected by special conditions.

**Determination of Billing Capacity:** The billing capacity in any month is the highest measured kilowatts within such month, but not less than 50 kW and not less than 80% of the highest measured kilowatts within the preceding eleven months. The interval for measuring billing capacity is 15 minutes.

**Determination of Reactive Capacity:** The reactive capacity is defined as the highest 15 minute lagging reactive load in kilovolt amperes occurring during the month as determined by continuous measuring instruments. The ratio between kilowatt and reactive capacity will be determined by continuous measuring instruments or by periodic tests at reasonable intervals and if determined by test the resulting ratio will remain in effect until a new determination is made.

**Discounts:**

**Primary Delivery:** If the service is taken at the Customer's property line and the Company is relieved of installing any transforming and sub-station equipment, except the metering equipment, the following deductions will be made from the kilowatt capacity charge:

## NET METERING RIDER

### Applicable to Customers on Rate 1, Rate 3, Rate 4 and Rate 5 with Alternate Power Source

**Availability:** This rider is applicable to customers who own approved Alternate Power Source(s) of electricity (with a capacity of less than 10KW that will not produce more capacity than customer's peak demand) other than the Bozrah Light and Power (Bozrah). Customer generation does not relieve Bozrah of the obligation to deliver all power requirements.

**Metering Requirements:** Metering equipment shall be installed that will allow measurement of total usage and of customer generation during each billing.

**Billing for Net Metering Customers:** The APS customer shall be billed the monthly service charge, a metered energy charge for all delivered kWh, applicable PPA and TCA for all delivered kWh, State Mandated Conservation charge for the customers total facility load (kWh) and a transmission and distribution fee for the customer's total facility load (kWh). The customer shall be credited the meter energy charge and applicable PPA and TCA for all received kWh.

### Definitions:

**Alternate Power Sources (APS):** Any non-utility electric energy source (with a capacity limitation of less than 10 KW) on customer's premises approved by Bozrah to provide electric power service to the customer. APS may not produce more capacity than customer's peak demand.

**Interconnection Costs:** Installation of a generation system that will interconnect with Bozrah's electric distribution system requires approval of BL&P and must conform to Bozrah equipment and engineering standards as set forth in Policy.

**Metering Costs:** To provide full requirements service, any and all costs above and beyond standard metering costs attributable to Customer's decision to interconnect and operate APS in parallel with Bozrah electric system. All metering installations must conform to Bozrah equipment and engineering standards as set forth in Policy.

**Parallel Operation:** The Customer's APS must be operated in compliance with the Bozrah Policy for parallel operation of self-generating facilities. Bozrah may suspend parallel operations of the Customer's APS if, in Bozrah's opinion, continued operation would endanger the operation, physical integrity of any Bozrah equipment or personnel or if such operation would cause or contribute to a system emergency.
